

SQL Fundamentals IN EXACT MATCH & BETWEEN RANGES OF VALUES

Create SQL commands to provide information for the following problems.

1. AW2008: List employees whose job title starts with 'Production'. Show the Business Entity ID and job title.
2. AW2008: List employees whose job title ends with 'Specialist'. Show the Business Entity ID and job title.
3. AW2008: List employees hired in 1999. Show the Business Entity ID, Job Title, Hired Date and Salaried Flag.
4. AW2008: List employees hired in 1999 and are salaried (flag = 1). Show the Business Entity ID, Job Title, Hired Date and Salaried Flag.
5. AW2008: Count how many people were hired between 1998 and 1999. Show only the count.

What to do:

1. In one file write all the SQL commands.
2. Before each command add the problem statement as a comment line.
3. The file must be simple text file with a TXT or SQL file extension. File need to be saved with your last name_SQL_STATEMENT_USED, and your name should be included in a comment line format
4. Test your commands and make sure they are error-free before submitting the solution file.

Refer to the book and Chapter 3 powerpoint for examples.
